RESEARCH ROADMAP & VISION STATEMENT

My research is focused on Fuzzy AI, Speech Processing, Machine Learning, Computer Vision, IoT Security, and Cybersecurity. I have published 100+ research articles of which 46 are in Scopus-indexed journals and maintained an annual publication growth of 10–25%. I lead a multidisciplinary research group applying decision-making models across Computer Science, Management, and Engineering domains. My current focus includes publishing in SCI-indexed journals, filing new patents, and expanding the RGU-ACIC incubation ecosystem. For the next five years, I plan to strengthen interdisciplinary collaborative research, secure major government-funded projects (DST, SERB, AICTE), enhance Ph.D. supervision output, and contribute to establishing research infrastructure benefiting the North-East India academic community.

DECLARATION
